WALDSO TURNER, 1905, *Business Manager*.

C. W. JOHNSTON, 1905, } *Assistant Business Managers.*
M. AHUMADA, Jr. 1906, }

OFFICE: 30 ROGERS, 491 BOYLSTON STREET.

OFFICE HOURS:

Editor-in-Chief Thursday, 10-11 A.M.

Business Manager Saturday, 12.15-1.15 P.M.

For the benefit of students THE TECH will be pleased to answer all questions and obtain all possible information pertaining to any department of the College.

Contributions are requested from all undergraduates, alumni, and officers of instruction. No anonymous manuscript can be accepted.

All communications with the Alumni Department should be addressed to the Alumni Editor.

Subscription, \$1.00 per year, in advance. Single copies, 5 cts.

Entered in Post-office, Boston, Mass., as Second-class Matter.

Puritan Press, Boston.

WHAT WILL FIELD DAY BE?

LAST year THE TECH referred to the preparations for Field Day, 1902, as an Alphonse-Gaston affair. This year we are at loss for a phrase, that one being entirely inadequate. The Sophomores are interesting themselves in a relay team, but their football team is a myth. Twelve men in the class have been rather regular in attendance at practice. This will never make a team a whit less ragged than the one which 1905 trounced with such ease last year. Is the tug-of-war to be an impromptu contest? Are squads to be raised from the attendant students on Field Day and taken out into the field, undrilled, to pull for a few moments at a big

rope? This will not be a tug-of-war, it will be a farce-comedy. The Freshmen are still worse. A cancelled game started their season on the gridiron. This class could not get a team together to play! Eleven fit men could not be found. Now that 1907 has organized, we may hope for better things from them; but 1906 can not be blamed too heavily for its dead-and-alive spirit. If we are to have a Field Day recognizable as such we must have a class feeling, a spirit of contention, fierce enough to be felt by every live man in the two classes. Nor are these lower classes alone to be blamed for this deplorable state of affairs. Do 1904 and 1905 try their best to start things rolling? Every one can answer this question, but who can reply to these: What is to be done, and what will become of our Field Day, which started with such flying colors? The present Juniors have placed their "1905" on that cup twice by honest work. Will 1906 and 1907 allow the honors of this year's contest to be decided by luck or, at best, by ragged, untrained teams? THE TECH will do all in its power to further a proper spirit; let others do the same and Field Day 1903 will firmly establish a fine custom here at Tech.

"THE TECH" WANTS YOU.

WE do not feel it beneath our dignity to admit that we want new men on THE TECH Board. There seldom will be a better chance for men who are interested in such work to make the college paper. With room for five on the editorial staff, two in the art department and two assistant business managers, it may readily be

seen that any man who will work conscientiously for a short time and who shows willingness to continue that work after election, will make the Board, if he have a spark of native ability. Many Freshmen hesitate to try from fear of overwhelming duties. The work is not at all exacting; all that is expected of a candidate is that he present on Monday mornings as much "copy" as he can write up during the week. Now is the time when news is plentiful. There are the '06 and '07 teams to be followed, the Track and Cross Country teams to be watched and the class elections to be reported. Things are happening all the time; any man with his eyes and ears open can find two or three locals every day. Remember, it is the regularity of the work that counts and not the class from which the candidate comes; the Freshman stands, perhaps, a better chance than the Senior—he has more years of usefulness on the Board before him. The Editor and the Business Manager are always ready to talk with and advise candidates and to help each to do the best that lies in him. We want you! We knew that before, now you know it.

THE RULES FOR FRESHMEN.

NOW that 1907 has been at the Institute for over two weeks we feel it our duty to introduce to them the rules for Freshmen which it is their duty to observe. Last year a joint committee from 1903 and 1904, "recognizing that college etiquette, good taste and the rules of the Athletic Association are frequently, through ignorance, violated," passed the following rule for the guidance of Freshmen:

No Freshman shall wear any hat, cap, sweater, jersey or sleeveless shirt bearing any preparatory school numerals, initials or insignia of any variety. However, sweaters or jerseys bearing such insignia may be worn inside out, or with the in-

signia on the back of the wearers. Preparatory school pins, if worn at all, should be worn so as not to be in sight.

The Sophomores were very lax in enforcing this rule last year, with the result that some 1906 men declined to observe it up to the end of the term. It devolves on 1906 to see that this does not occur again. The Freshmen now have had due notice and cannot plead ignorance of the rule. Go ahead and enforce it to the best of your ability, 1906; such a course will stir up both of the lower classes and will give 1907 some old scores to wipe out on November 7.

Our Site and the New Building.

The controversy opened by abutting property holders when the moving of the Institute was advanced, is a subject to which THE TECH has carefully avoided reference. It was felt that until the merits of the case had been decided, whatever comment could be offered on the progress of the matter would not be free from a charge of partiality. Now that the legislature and the Governor have approved of the Institute's stand, it has been decided to give a brief résumé of the matter and an explanation has seemed desirable.

It is nearly a year since a bill was introduced into the legislature to deed to the Institute the land upon which the Rogers and Walker Buildings are situated. A glance backward will illustrate the necessity of this action. In 1861 a legislative act was passed, providing for the use of two-thirds of this square of land by Technology. If the college officials could satisfy the Governor and the Council within one year that they were fully organized and possessed a fund of at least \$100,000, they were to be allowed the use of the land rent free, and the perpetuity of this condition was assured. Only one-third of the land granted was to be thus occupied by buildings.

From the act of 1861 it will be seen that the Institute was merely located on the land, free of rental, but that all property rights remained vested in the state. Last winter it was decided that, as the land had been for forty years totally unproductive to the state, and as it would be of immense value to the Institute, the bill proposing the entire transfer of the land should be introduced. This was equivalent to a gift of about \$2,000,000. Assuming that the Institute intended the sale of the land, the abutters, the value of whose property has become highly inflated by its proximity to a public square, and to

the slightly grounds upon which we are located, immediately opposed the passage of the bill.

Claims in equity were advanced and the matter was thoroughly argued out before the Ways and Means Committee of the legislature. Certain ill-advised compromises were proposed, one representative even desiring to use the land for the foundation of the Franklin Industrial Institute, thus leaving Technology entirely in the cold. The several hearings of the committee occupied considerable time, and the absolute right of the Institute to use the land as it might desire, if transferred, was clearly demonstrated. Being favorably reported, the bill passed the House without any of the proposed restraining amendments. The senate passed it with practically no discussion and the Governor's signature made the act valid. This occurred in June, 1903. The land was thus wholly released to the Institute with the trifling restrictions that all buildings should conform to municipal regulations and should not be for purposes of stables or manufactories, and that a minimum space of 22 feet should intervene between the front walls and the street on the sides towards Boylston and Newbury streets.

Possessing these rights the board of trustees have decided to erect a five-story building between Rogers and Walker. While utility and instant necessary expansion are the main reasons for such action, the fact that this is practically a test of the Institute's property rights has led the abutments to seek restraint through an injunction. This will be the final test, and is founded on the question of whether more than one-third of the land can properly be utilized for building purposes. The contest, if insisted upon, will be rapidly pushed by both sides, and the Institute, if all goes well, will soon have its property rights unquestioned.

The new building will be, as stated, between Rogers and Walker. As only 66 of the 97 feet between the buildings will be utilized, and as the new building is to be only 48 feet deep, very little light will be shut off, and the lawns will be kept nearly intact. The Newbury Street front will be 22 feet from the street, while Rogers is 33 and Walker is 30. The new building will thus not extend far between its neighbors. Its height, as theirs, will be 80 feet, consisting of five stories, and its appearance will harmonize with both of the other buildings. Considerable difficulty was experienced in planning an edifice so near to two others which are as dissimilar as Rogers and Walker, but the design, while plain, is quite effective. Theo H. Skinner of Rand & Skinner is the architect.

Half of the basement is to be occupied by an extended mining laboratory, the other half by an extension of the laboratories under the Walker Building. The first floor, connecting with Rogers Library and with Walker, by covered passages, will

contain four lecture rooms 22 feet by 32 feet. The second floor will be arranged for the private use of the Faculty, for receptions, etc. The upper stories will be devoted to laboratories, each 44 feet by 46 feet, the whole being heated by steam and lighted by electricity. It is expected to begin construction in the near future.

Various sentiments have been expressed by students, to the intent that the project of moving had been apparently abandoned, the new buildings being cited as proof. The plan of moving has never been anything more than a suggested proposition, but it will be the natural and proper evolution of our present rapid growth. The erection of buildings costing well under fifty thousand dollars need not be taken as indicative that Tech will not move. While this could in no case take place in our undergraduate days, our successors will undoubtedly have the opportunity of studying in a less confined and quieter location.

Sophomore Athletics.

It is a little early to criticise the teams which are to represent 1906 in the Field Day games, but it is evident that the time is none too long to develop satisfactory teams. The tug-of-war candidates have not yet been called out, but about half the proper number of men are now working for the football and relay teams.

It is hard to form an idea of the quality of either of these teams, especially the relay, on the basis of this season, but the men are working hard and can be depended upon to put up a strong fight if supported by the Class.

The relay team has been doing light work at the Oval daily, under the direction of Captain Mann, and if he can infuse some of his spirit into the men, 1907 will have to fight the last inch of the relay race.

The football team is badly handicapped by lack of proper grounds, the greensward back of the Gym not being adapted for football. Captain Geist's greatest need at present, however, is more men, so that two elevens may be formed. The attention of 1906 men is called to notice in this issue for more candidates. The team as a whole is playing very ragged football, the principal fault being their

inability to get into the spirit of the game; the line does not help the backs properly, and the second line of defence has much to learn. These faults would be corrected if there was a second team to line up against every day. The game Saturday which was lost to Dedham 11 to 0, was inconclusive, but gave every man a little necessary practice. The candidates seem fairly heavy and if a second team can be formed good coaching ought to turn out a satisfactory team. The Class must realize that its duty is not done when it has elected a captain, and quite aside from the honor of winning numerals, Class loyalty should bring out enough men to form representative teams.

Freshman Class Meeting.

The first meeting of 1907 was held in Huntington Hall last Saturday, the meeting being called to order by R. M. Turner, '05. The object of the meeting was to start the work of organization and incidentally to devise plans for Freshman athletics this fall. With this end in view, the following temporary officers were elected: President, G. W. Otis; Secretary, N. A. Middleton; Treasurer, Rood.

The committee chosen to draw up a Constitution and By-laws consisted of Messrs. Miller, Griffin, Noyes, Macomber and Potter. Good, strong class spirit was manifested throughout the entire meeting; but it was class spirit of the right kind. Its keynote was: First for Tech and then for the Class. Judging from the amount of enthusiasm shown, and the preparations made for athletics this fall, the boys of Naughty-six will have to exert themselves to the utmost to defeat the newcomers on November 7.

Freshman Dinner.

A dinner for the Freshman Class was given Wednesday evening at the Union by the House Committee. The dinner was given for the purpose of getting the men into the habit of using the rooms and of arousing interest in Tech affairs in the new men. Norman Lombard, '05, presided, R. A. Wentworth, '04, G. B. Perkins, '05, William Green, '05 and others addressed the men in the interest of the Tech Show, *THE TECH*, *Technique*, Athletics and other student activities. Considerable enthusiasm was stirred up and it is felt that the dinner fulfilled its mission.

HAROLD RICKETSON SWEETSER.

WHEREAS, In the death of Harold Ricketson Sweetser, drowned during the past summer, the Class of 1905 of the Massachusetts Institute of Technology has lost one of its most worthy members; be it

RESOLVED, That we, his classmates, hereby express our deep sorrow at the sudden ending of his career, so rich in promise of future attainment; and be it further

RESOLVED, That we extend our sincere sympathy to his family in its bereavement; and be it also

RESOLVED, That a copy of these resolutions be published in *THE TECH*, sent to his family and spread upon the class records.

For the Class of 1905.

F. P. POOLE,

GEO. C. THOMAS.

M. I. T. Fall Handicap Games.

The fall handicap track games will be held on the Tech Oval, October 22, 23 and 24, starting promptly at 4.15 each day.

Wednesday, October 22: one mile run (60 yards limit); Running high jumps (6 inches limit); 80 yards high hurdles (8 yards limit); putting 16-pound shot (8 feet limit).

Thursday, October 23: half mile run (30 yards limit); pole-vault (2 feet limit); 80 yards low hurdles (8 yards limit); running broad jump (2 feet limit).

Friday, October 24: two mile run (120 yards limit); 75 yards dash (8 yards limit); one-fourth mile run (30 yards limit); throwing 16-pound hammer (20 feet limit); throwing discus (20 feet limit).

Silver and bronze medals are to be awarded as first and second prizes in each event.

It is all-important that the games start promptly at 4.15, owing to the shortness of the days.

1906 Nominations.

The following nominations for class officers have been handed in to the 1906 Class Secretary. This is only a partial list. It was found necessary to extend the time to Wednesday the 14th.

President, Wm. J. Knapp, E. V. Wetherer; Vice-President, Maxwell Coe, A. W. Geist, Wm. A. Redding; Secretary, H. E. Darling, A. P. Mathesius, W. B. Wyman; Treasurer, Nugent Fallon, Wm. Neilson; Institute Committee, F. B. Guest.

Second Call for Cross Country Candidates.

Men are wanted to come out for the Varsity Cross Country Team. So far only about fifteen men have appeared for a team to consist of at least six men. This team gives a greater opportunity to green men than any other form of running; in fact the man who won the cross country race last fall was a green man. The trials will be held October 31, and until then Mr. Mahan will train every man who comes out. Members of a winning team will be awarded the T. Report at the Oval at 4 P.M. equipped for running.

E. H. Lorenz, *Captain*.

F. B. Riley, *Manager*.

1905 Class Meeting.

A meeting of the Class of 1905 was held in Huntington Hall, Monday, October 12. Marcy, Weaver, and Grant were appointed Election Committee. The treasurer's report was read and accepted. Poole and Thomas were appointed a Committee on Resolutions on the death of H. R. Sweetser. Attention was called to the art competition for *Technique*, '05. It is hoped that every '05 man who has any ability, will show proper spirit and try to get a place on the art staff. Attention is also called to the fact that men behind in the payment of class dues will not be allowed to vote at the coming election.

Calendar.

THURSDAY, OCT. 15.

8 P.M. SOCIETY OF ARTS. 583d Regular Meeting at Lowell Building. Mr. John P. Fox will address the Society on "American Rapid Transit in Sight of European Experience."

FRIDAY, OCT. 16.

4.00 P.M. FALL TENNIS TOURNAMENT Entries close. Fee, 75 cents.

SATURDAY, OCT. 17.

1.14 P.M. SOPHOMORE FOOTBALL SQUAD Report at Gymnasium.

2.07 P.M. HARE AND HOUND CHASE. Men leave Trinity Station for Wellesley Farms.

3.00 P.M. 1906 vs. LAWRENCE HIGH SCHOOL at Lawrence.

6.00 P.M. FIRST TECH UNION DINNER. Everyone invited. Tickets to be obtained from Mr. Derby, the President's secretary. Per cover, 25 cents. This year the hour has been changed from 6.30 to 6.00.

WEDNESDAY, OCT. 21.

1.45 P.M. SOPHOMORE FOOTBALL SQUAD Report at Gymnasium.

3.00 P.M. 1906 vs. BROOKLINE HIGH SCHOOL at Brookline Common.

4.15 P.M. WEEKLY Y. M. C. A. MEETING at Tech Union.

THURSDAY, OCT. 22.

4.15 P.M. FALL HANDICAP MEET. See program for details.

FRIDAY, OCT. 23.

4.15 P.M. FALL HANDICAP MEET. See program for details.

8 P.M. THE DEAN AND ADVISORY STAFF will tender an informal reception to the graduate students attending the Institute at the Technology Club, 83 Newbury Street.

Chemical Society.

Attention is called to members of the Chemical Society that their dues are now due and that a prompt payment will be greatly appreciated by the Executive Board.

Farrel, '04, the treasurer, can be found in the Organic Laboratory at almost any time. Sophomores are eligible to associate membership. New men should apply to

WM. H. KEEN,

Secretary.

Dr. Talbot will address the first "Smoker," which will be held in the near future.

Senior Class Election.

Nominations for Senior Class officers for the year 1903-1904 must be left at the "Cage" before 1 P.M., Saturday, October 17, for Currier Lang, Secretary. Officers to be elected are: one president, one vice-president, one secretary, one treasurer, two board of directors, and two Institute committee.

Nomination papers must be written in ink and signed by ten members of the class. A list of nominees will be posted Monday, October 19, in Rogers corridor, and will remain two days.

Ballots will be sent only to men who have paid last year's 1904 Class dues (fifty cents).

Men who have not paid this assessment should send fifty cents to R. A. Wentworth, Treasurer, "Cage," at once, in order to have their names on the voting list. No names will be added after 1 P.M. October 17.

Men in doubt as to their status should consult the treasurer in person or by note left at the "Cage."

Hare and Hounds.

This fall, as last, hare and hounds chases will be held, under the auspices of the Cross Country Association, every pleasant Saturday. It is the aim this year, however, to have these chases entirely distinct and separate from the Cross Country team work, so that men who care for the sport, merely, will not have to follow a pace set by men training for a race.

Although hare and hounds chasing has been in vogue at Tech for several years, there are still many who might enjoy it, but are either entirely unaware of its existence, or totally misinformed as to what it is. The men, provided with running suits or gymnasium suits and sneakers, meet at the gymnasium or station, and go out into the suburbs together to some place where there are convenient dressing quarters. The hares are given five minutes' start, the hounds following

them over the course, keeping well bunched all the way, as no sprinting ahead is allowed till just before the finish, which is at the starting point. The first few chases will be short and easy, so that men who are not accustomed to take runs of this sort will find no difficulty in keeping up. Notices of these will be found posted on the bulletin in Rogers.

There seems to be an idea prevalent at Tech that the hare and hounds chases are solely for athletes, but it is just the other way; the athletes get all the running they need in the Cross Country team, while the hare and hounds chases are intended for those who want an afternoon's sport. To this end, the first runs this fall will be short and easy, so that new men, who are not accustomed to such work will find no difficulty in keeping up.

There was no run last Saturday on account of the rain, so the first one will be this Saturday at Wellesley Farms. Everybody turn out and get an even start. Train leaves Trinity Place Station at 2.07 P.M.

Mechanical Engineering Society.

The attention of members is called to the fact that the Society Shingles are now ready. One is on exhibition in the M. E. S. Bulletin in Engineering A. and may be ordered of the President, E. O. Hiller, or of the Secretary, A. M. Holcomb. All Course II. and X. Juniors and Seniors are eligible for membership in this Society, and any wishing to join should make application as soon as possible to Poole, '05, Thomas, '05, or any of the officers of the Society.

THE TECH wishes to call the attention of the secretaries of all societies and clubs and the managers of all teams that its columns are always open for all announcements, calls for candidates, accounts of meetings, elections, etc. And that in order to publish the same we must keep in constant touch with them. All notices should be left at the "Cage" not later than 9 A.M. Mondays. We cannot keep track of your doings without your assistance.

Woodward, '07 has been elected captain of his class football team.

Mr. J. M. Gammons has been appointed assistant in the electrical laboratory.

F. J. Fraser, ex-'05, is studying law at Leland, Stanford.

The Golf Club is practising regularly at Franklin Park. Members from the Freshman Class are desired.

The 1906 football team will practice every day at 4.15. More men are needed to form a second team.

T. W. Estabrook, ex-'05, is connected with the Oxford Paper Mills at Rumford Falls, Me.

The Freshmen have been divided into four companies, a band and a signal corps. Last year six companies were started.

Announcement of close of *Technique*, 1905, Art competitions is to be found on the *Technique* bulletin board, Rogers Corridor.

U. J. Nicholas has been elected manager of the 1906 relay team. The manager of the football team is M. E. Vinton, Jr., and of the tug-of-war J. N. McKernan.

Nominations for 1905 Class officers, accompanied by ten signatures, must be left at the "Cage" for 1905 Election Committee before Saturday, October 24, at 1 P.M.

The Tennis Association announces that the entries for the fall tournament will close at 4 o'clock on Friday, October 16. Entries for singles and doubles 75 cents. The drawings will be posted on Saturday.

President Pritchett's trip to Berlin is one for rest and recreation only. It is probable that he will be gone from four to five weeks and that he will visit Charlottenberg during his stay in Germany.

The Class of '03 is to hold an informal reunion at the Union on the evening of November 6. On Field Day, the 7th, all '03 men who can arrange to be in the city are to attend the Freshman-Sophomore contest as a class.

The treasurer's report of the 1906 Class shows a debt of \$95.00. In hopes of making up the deficit without the levying of a new assessment, this has been delayed for two weeks. All men having unpaid dues should interview the treasurer.

The Chess Club.

The first official meeting of the Chess Club was held Saturday, October 10. Officers were nominated as follows for this year: President, H. M. Edmunds; Vice-President and Business Manager, W. I. Lowrie; Secretary, I. Niditch; Treasurer, F. J. Van Hook. Committees were appointed to draw up a new constitution and for making arrangements in regard to the coming tournament. About ten new men have already entered the Club.

Next Saturday, at 3 P. M. the second meeting will be held at the Union. Elections will then occur and there will be a little preliminary work. All Tech chess players are cordially invited.

Communications.

The Editors do not hold themselves responsible for opinions expressed by Correspondents.

It is reported that four books belonging to different students have been taken from the lunch room within the last week. This is an unusual state of affairs and no small matter to let pass unmentioned. While advocating the "Honor System," it might be well, also, to provide some means for the safe-keeping of books during the lunch hour. Every man should make it his business to see that such persons be severely dealt with.

EDW. B. RICH, '04.

'02, Albert E. Lombard, II., and Miss Marie Pugsley were married September 23, and will be at home after November 1, at 2806 East Thirty-first street, Kansas City, Mo.

'02, D. M. Belcher, XI., is working in Brooklyn on the investigation of the water supply of New York City.

'02, Conrad Wendell, I., who is with the Pencoid Bridge Company of Philadelphia, has been for the past year in the field on erection work.

'02, H. Baetjer, I., is in the bridge engineer's office of the Pennsylvania Company at Pittsburg.

'03, E. S. Baker, VI., is in Spokane, Washington, working on the construction of an electric line between Spokane and Ponce d'Alene.

'03, W. M. Gilker, VI., is with the American Telephone and Telegraph Company at Pawtucket, R. I.

Request.

The recorder asks that all class officers, captains and managers of teams, the members of Institute committees and corresponding officers of societies leave a special tabular view, showing where they may be found about the Institute buildings. It is often important that these men be found, but it is often not only difficult but impossible to do so. The undergraduates have much for which to thank Mr. Powers, and these men should not delay in aiding him and themselves.

The latest fad among recent Tech graduates is to get married. Many of the '02 men have already sent out the engraved messengers of joy, and others are even now discussing with their sweethearts whether the Old English style is really worth double the script. Hearts which formerly beat as two now beat as a tattoo. The strong 5 per cent nickel steel arrows of Cupid have overcome by direct impact the crushing strength of the Tech man's heart. Many a man whose hardest problem heretofore has been to determine the maximum deflection of a beam, will now find it more difficult to agree with Alice or Maud (as the case may be), as to whether the sitting-room would look best in burlap or ingrain. The issue will most likely be decided by hiring a suite of rooms papered ten years ago with a figured red wall-paper. In behalf of President Roosevelt, THE LOUNGER congratulates all bachelors of science who are giving up their bachelorhood and looking toward the higher degree, *pater-familias*.

Yale has a bicycle, a tobacco mixture, and a lock named after it; Harvard, a beer, a cigar and a union suit; and at last THE LOUNGER thought that Tech would have a barber shop. The beautiful sign across the street in purple and gold, which made it appear that THE TECH had changed its office, has been taken down again. Many were the surmises made at its first appearance. Some thought that THE TECH had had a sudden rush of generosity to the head and established a Seat of Barber-y, as it were, a Course XIV. Why the sign is not up now, THE LOUNGER does not know. Perhaps some Freshman took a fancy to it (a Freshman's idea of a joke is about as big as a dried, split pea). Perhaps Bursar Rand, not enabled by nature to enjoy more than a ten-cent course there at one time, and envious of the headway they were making, took the sign one dark night.

THEATRE ATTRACTIONS

Week commencing October 12, 1903.

Tremont Theatre.—“The Yankee Consul” closes its engagement this week. Next week, Grand Opera in English. “La Tosca” will be presented Monday evening.

Majestic Theatre.—Owen Wister's fascinating story of the Wild West, “The Virginian,” will be presented at this playhouse for the last week. Next week, “The Earl of Pawtucket.”

Colonial Theatre.—Jerome Sykes in “The Billionaire,” will end his engagement this week. Next week, Frank Daniels in “The Office Boy.”

Hollis Street Theatre.—Julia Marlowe will end her successful engagement in “The Fools of Nature” this week. Next week, “The Light That Failed.”

Globe Theatre.—Charles Richman in “Captain Barrington” opened a limited engagement this week. The greatest feature of this play is its gorgeous stage settings.

Park Theatre.—Annie Russell in “Mice and Men” opened a limited engagement this week. Miss Russell is one of the greatest favorites on the American stage.

Boston Theatre.—The best New England play, “Quincy Adams Sawyer,” continues to draw large and appreciative audiences. Get your seats in advance.

Castle Square Theatre.—“Lover's Lane” is being presented by the regular company this week. Next week, “Sowing the Wind.”

The Technology Review

A QUARTERLY MAGAZINE
DEVOTED TO THE
INTERESTS OF THE
MASSACHUSETTS INSTITUTE
OF TECHNOLOGY

AND

*Published by the Association of Class Secretaries
83 Newbury Street, Boston*

The Review aims to develop closer relations among Institute men, and to stimulate their interest in the work of the College.

It is in no sense an engineering magazine, but deals broadly with the problems of Technological Education and the responsibilities of the professional man.

SUBSCRIPTION, ONE DOLLAR A YEAR
SINGLE COPIES, THIRTY-FIVE CENTS

Volumes I., II. and III., finely bound in half-morocco, are ready for delivery at \$2.00 each, or will be exchanged for unbound sets, provided they are in good condition, at \$1.00 each. (If sent by mail, 30 cents extra.)
